GAURAB LOHANI

Backend Developer Intern | Python • Django REST Framework • SQL

+977 9762748494 • gaurablohani01@gmail.com • Kathmandu, Nepal • github.com/gaurablohani01

PROFILE

BIM student at Tribhuvan University seeking a **Backend Developer Internship**. I build RESTful APIs with Python and Django REST Framework and design relational databases in SQL, with a focus on clean code architecture, data normalization, and query performance. My BIM background lets me connect business requirements to the data structures and server-side logic that support them. Motivated to learn from experienced developers and contribute to real-world codebases.

TECHNICAL SKILLS

Backend Frameworks	Django REST Framework (DRF), Django
Languages	Python, Java, PHP
Databases	SQL (PostgreSQL / MySQL)
Core Concepts	RESTful API Design, Object-Oriented Programming (OOP), Database Normalization

PROJECTS

Hospital Management API

Python • Django REST Framework • github.com/gaurablohani01/hospital_management_api

- Built a RESTful backend for hospital management using Django REST Framework.
- Designed API endpoints and data models for handling hospital records.

Banking App API

Python • Django REST Framework • github.com/gaurablohani01/Banking-app-API

- Built a RESTful backend for a banking application using Django REST Framework.
- Designed API endpoints and data models for banking operations.

EDUCATION

Bachelor of Information Management **2024 – Present**
Tribhuvan University, Kathmandu

Higher Secondary Education (SEE & +2) **2020 – 2024**
Future Star English Secondary Boarding School, Lamjung
